

If consciousness is everything, which it is; then your mind is of paramount importance. Your mind is your ticket to freedom. An untrained mind will always be the victim of nefarious control actions.

Truth is simple. The untrained mind is steeped in illusions.

Why do the Lords in the Light (the energy vampires) want this World to be completely controlled by their agents here (the Zionists)? Because it completes the circle (simple). It ensures the so-called Lords are nourished for eternity. If people wake up and say no, their dream is shattered.

*The sleepy human race, steeped in illusions and placing importance on unimportant matters...*

The wars have multiple purposes. Yes they're good for business and capturing resources, but the main reason for them is to keep us distracted (looking the opposite way) whilst they introduce more and more control mechanisms. We are literally becoming enslaved because we're looking in the wrong direction! Divide to conquer always works...

This is a video of a super-smart black guy – Hotep Jesus. You might need to watch it several times to glean his wisdom. If you can't find the time or you don't have the inclination – that says it all.

<https://banned.video/watch?id=655565b283545c8f3d7a9647>

Do you think that billions of people can be enslaved because they've been successfully distracted? Absolutely – that's what's happening right now! Sleep-walking into a trap...

Do you think they can retire you later and kill your earlier thus keeping more for themselves? Absolutely – that's what's happening right now!

Do you think they can force you to take their experimental shots (the kill shots) every year? Absolutely – they will simply restrict your access to your bank accounts until you've done so.

The main weapon of the Zionists is their programmable CBDC. Governments should be issuing currencies, not Central Banks.

The main weapon of the so-called Lords is fantasy (illusion). So let's take a quick look at that:

If you or I take sides then we've lost. Like Hotep says – it's just a chess game. If you think the Zionists wouldn't sacrifice their own kind for their agenda, then you need to WTF up because they recently did it. I also agree with Hotep when he says the Palestinians are now the PLM (the new BLM); it just keeps repeating to keep people distracted.

If you or I take a position on someone and we're not 100% sure about that, then we are living in fantasy land (living with our phantoms in our mind). Phantoms copulating. Fantasy and illusion is not real and 99% of the World's population are living in it. We don't need virtual reality; we've already got it – it's everyone's untrained mind.

*Fantasy is the last mastery because to go beyond it, is to free yourself from the demons in the light..*

Family is only as important as you are. People delude themselves with family. What's really important is that your family read this and if you choose to not share it with them...well...

I could talk a lot more about fantasy but I don't think people have the appetite for it ~ Gary Bate.
