

The greatest compliment anyone can pay you by Gary Bate

I look forward to the day that someone says it to me...

Are you your Father? Yes you are.
Are you your Mother? Yes you are.
Are you your Son? Yes you are.
Are you your daughter? Yes you are.

We are all genetically-driven personalities and we are all the same.

The only difference between your father and you is he is asleep and you are awake. Awake to what?

You can hide like a caterpillar. You can die as a caterpillar. You can go to caterpillar events...

But can you change yourself and become a beautiful butterfly? Can you change from being a genetically-driven personality into a personality of your own design? Imagine that.

Change is evolution and it's the most important thing in the World. It's actually why we are all here..

The greatest compliment anyone can pay you is to say to you – “you've changed”!

Will you notice it in other people? Do you notice butterflies?

Your mind can be your ally; it can tell you, “don't do that otherwise you might burn yourself”: but in the context of your evolution, it needs re-wiring. It's like one of those old-fashioned telephone exchanges – where the operator unplugs a wire and re-plugs it higher up.

Everything in your mind has come from your PAST thinking. This is what is meant when I say Christ consciousness has no PAST. It's changing your mind – that's what evolution is!

In theory it's just as easy to go forwards and upwards as it is to go backwards and downwards, except for one huge thing – your mind pulls you backwards and downwards...

Forwards is the future and it's where the love is.
Backwards is the past and it's where all of your emotions are.

Genetic personalities are mindsets driven to go down the slippery slope towards their own demise. That is what you're here to change in YOU.

You never lose your wisdom; it's in your Soul. The question for you to address is this: Do you want to remember this life? The only way you can keep this memory is if you turn your back on the light.

All times exist now like different slices through the same apple. Your past life is playing out now. Your future life is playing out now. Which one do you want to go to? Do you want to stay in the past, in repetition, spinning your wheels indefinitely with no carried-forward memories? Or do you want to move on up to a future timeline where the love is? It's NEVER too late to change...

People don't buy my books because they aren't ready to change (they are stuck in their own emotions). I can only help people who want to be helped. I've made the knowledge available and that's all I can do ~ Gary Bate.
