We've all been scammed by Gary Bate

Human life is not revered or valued here. We saw what happened to our old dears during Covid and today we still see all of the atrocities that the power brokers initiate. Working-class people (like me and you), are mere canon-fodder here – why?

It cuts both ways – you live a longish life and invariably they're making money on your addictions. The rationale for you is that you paid for it with your taxes.. Or you die after a shortish life and your memories are harvested in the fake Light, before they send you back through the revolving door..

They warn you about scammers before they scam you; but they never tell you about the biggest scam of all time – the Light.

You buy into their conditioning and you think you're going to successfully negotiate their Light?!

Come on, you'll believe any old rubbish they tell you..

Well one day you're going to be back there again and you'll see just how switched-on you really are. I mean have you got the mindset to question everything?

There are no helpers on the other side; you're left to your own devices – tell them they don't have your permission to take your memories! And how are you going to respond when you hear a voice that tells you that you've done well and you are 'home'? It's the ultimate con-job!!
