

I've always said (throughout all of my books) that evolution is the reason we are here – after all, why else do we have a Soul? Our Souls are programmed for evolution! This means we are here to change ourselves from the 'born into' identity into the real identity...

So what does that mean? It means freedom! We do not have freedom in this World; that's an illusion here – we can only go to where they allow us to go...

The abilities to bi-locate and time-travel are the only real freedoms and they correspond with our real identity.

What we strive to achieve, possess and accumulate here; are the very things that bind us to this World and thus prevent us from experiencing freedom.

To evolve you have to learn the truth about yourself – you have to know what your real identity is and then slowly become it, which means you purge your 'born into' false identity and slowly modify your behaviour to match your real identity.

Your actions (behaviour) have to match what you say you are, otherwise you are divided against yourself. For instance, if you say you are Vulcan but you act like Human then you are Human. It is your behaviour that determines what you are.

Evolution – learn it, speak it then become it.

The truth is – there are no limits to us, but we limit ourselves because we keep the same focus...

We atrophy and die because we don't evolve – because we don't become more unlimited. We have to somehow shift the focus from the known onto the unknown and make the unknown known to us.

My latest book – Pure Mind – is a real challenge to limited thinking and limited thinkers.

Christ is a Time-Traveller. How can you die when you've mastered time? Enlightenment is all about mastering time. There are 2 short pdf's about time at the bottom of my home page...

We all have the choice – we can continue to focus on the things that limit us or we can dream a new reality into being.

The next pandemic is just about to hit (they're doing the simulations now). Will you be up for those vaccines as well? They'll produce them real quick because they've already got them. They have proven that they can lock us down whenever they want. The way out of this? Enlightenment...

If you're not evolving then your Soul doesn't have a reason to be in your body. It's very patient with you but it has a limit to that and that limit is when it can no longer see a potential for growth in you. That's when its overlord, your Spirit, calls in back and it leaves your body.

Growth (wisdom) for the Soul isn't always obvious. Sometimes much wisdom can be garnered from pain and suffering and likewise from various forms of disablement. The Soul thinks nothing of a disabled lifetime just to learn one lesson.

The opportunity for you is not to wait for your next lifetime because you might be less conscious next time around; it's to seize the opportunity now and free yourself from centuries of enslavement. You can't do it for anyone else and only you can do it for you. I'm just trying to help ~ Gary Bate.
